PROJECTS

Celo Shop — *Purchase and reward platform.*

Role: Developer (Solo - Developed for Build With Celo Hackathon)

A decentralized Web3 online shop that leverages the Celo blockchain to create a secure, transparent, and community-driven marketplace. It features a loyalty program to reward users with cUSD/Celo for their participation and purchases, fostering a sustainable and engaging shopping experience. By integrating decentralized finance (DeFi) principles, Celo Shop aims to democratize e-commerce, providing equal opportunities for buyers and sellers while maintaining high standards of trust and transparency.

Auto Saver Dapp.

Role: Frontend Developer.

An innovative Auto Saver Decentralized Application (DApp) designed to automate savings and investments using smart contracts on the blockchain. The platform allows users to set saving goals, schedule automatic transfers, and earn interest on their savings through decentralized finance (DeFi) protocols.

DEX - *Decentralized Exchange on Arbitrum*

Role: Frontend Developer.

A Dapp that enables peer-to-peer trading of cryptocurrencies without intermediaries. This platform offers wallet integration, liquidity pools, and automated market making. Built with a focus on security and user experience, it provides a seamless and efficient trading environment, empowering users to trade with confidence.

UmmahConnect - *Bridge the learning gap within the Ummah.*

Role: Project Lead & Developer (Team Project - Developed for Muslim Tech Expo Hackathon)

July 2024 – Present

UmmahConnect is a community-focused platform designed to unite Muslims worldwide by leveraging technology to foster educational growth, community engagement, and networking opportunities. The platform provides a rich content library, interactive forums, and live events to support a vibrant and connected global Muslim community.
