EXPERIENCE

Entropy Labs — Co-founder

NOVEMBER 2021 - PRESENT

- Building web3 centric products for branding and marketing. - Won \$40,000 for projects in various hackathons.
- Built products around NFTs, custom tokens, DAOs and utility NFTs on Ethereum, Polygon, Solana, Tezos and Celo blockchain.
- Conducted a side event at FIL-Singapore

Altogethr — Development Intern & Founding team member

JULY 2020 - PRESENT

- Worked on the front end of the web application.
- Developed the chrome extension for the platform end-to-end. - Worked on the MyNetwork feature.

Girslscript Summer of Code — Open source contributor & Mentor

MARCH 2021 - JUNE 2021 | MARCH 2022 - JUNE 2022

As a contributor:

- Made 50 PRs in 3 different open source projects.
- Contributed to issues using 3 programming languages (Javascript, Python, Dart).
- Worked on automatically updating the website based on new commits merged in the repository.

As a mentor:

- Guiding open source contributors to build a platform that facilitates multi-chain minting of NFTs.
- Maintaining the project by merging pull requests and assigning issues.

PESU ISFCR — Student Intern

MAY 2020 - JULY 2020

- Worked on an Observational study to determine the role of the filesystem in the modification of hash value.

EDUCATION

PES University

B.Tech Computer Science

2019 - 2023

Ryan International School

High School and Middle school

JUNE 2009 - APRIL 2017

SKILLS

Programming Languages:

Python, C, Java, C++, Rust, Solidity, Javascript, Dart, PHP.

Frameworks:

ReactJs, NodeJs, React Native, Flutter, Symphony, Flask, Unity.

Databases:

Sqlite, Mysql, Postgres, MongoDB,

Blockchains:

Ethereum, Polygon, Tezos, Flow, Solana, Tezos, Celo.

Blockchain tooling:

Truffle, Hardhat, Remix, Ethers.js, Web3.js, Moralis, Chainlink, IPFS.

PROJECTS

Cryft — *Onchain loyalty program platform*

Cryft is a platform-agnostic app made using React Native. We use Celo to develop our smart contracts and CHIPS (ERC-20 standard token). Contract deployed on Alfajores testnet.

[Submission Link](#)

GeoNFT — *GeoLocation based NFT drops*

GeoNFT is a blockchain-based game where brands and creators can airdrop Geo-location based NFTs. Built using React Native, the smart contracts are deployed on the polygon mumbai testnet.

[Submission Link](#)

Odyssey — *Pokemon Go for Utility NFTs*

Odyssey is a NFT hunting game where users go around and hunt for NFTs in Augmented Reality. This game was built using unity and thirdweb SDK and deployed on the polygon mumbai testnet.

[Submission Link](#)

Eigen — *Enabling DAOs that create the most fine tuned AI models.*

EIGEN is a platform that hosts DAOs that mainly focus on training AI models. The owner creates a DAO Volunteers request to contribute Volunteers/DAO Members interact with the DAO The owner checks data to run the model Storage Providers claim contributions to store Output is used by end users

[Submission Link](#)

NFTickets — *A dApp where tickets are sold as NFTs* Brands

list their event and create different types of tickets they are selling into different sets of NFTs, they get a unique QR code once they mint those sets of tickets. Users scan QR codes at the event to get entry into the event.

[Submission Link](#)

FOSSDAO — *Harness DAOs to power Open source software.* Users

are incentivized to make contributions, they are rewarded with tokens for successful contributions.

AWARDS

Overall winners @ ETHGlobal FVM Spacewarp Hackathon - Won prize of \$10000

Global Runners-up @ Web3Infinty Hackathon - Won prize of \$10000

Storage Wizard prize @ Chainlink Spring hackathon - Won prize of \$7500

2nd place @ Encode x Chainlink hackathon - Won prize of \$7000

Finalist and 4 sponsor prizes @ EthGlobal BuildQuest - Won prize of \$5000

Best DeFi project - India @ Celo Mobile Hackathon - Won prize of \$4000

3 Sponsor prizes @ EthGlobal Road2Web3 - Won prize of \$2300

2 Sponsor prizes @ Polygon BuildIt - Won prize of \$1250

3 Sponsor prizes @ EthGlobal HackFS - Won prize of \$1250
